PROFESSIONAL EXPERIENCE

Jet Support Services, Inc. (JSSI)

PHP Developer / Full Stack Developer | October 2025 – Present

Clark Freeport Zone, Philippines | Remote

Philippine employing entity: Traxxall Technologies Inc. – Philippine Branch

- Lead modernization and engineering delivery across 2 aviation SaaS products and 1 internal platform, covering application architecture, security, cloud infrastructure, system integrations, developer productivity, and AI-enabled workflows.
- Modernized a legacy payment platform spanning customer onboarding, billing, wallet management, and payment processing using PHP 8.2, Laravel 11, Vue.js, and Bootstrap 5.3, improving maintainability and enabling future product enhancements.
- Spearheaded a 284-commit architectural refactor, introducing service-oriented architecture, standardized validation patterns, automated testing, and consistent development practices to improve maintainability and code consistency.
- Built AI-assisted developer agents and workflow automation across 3 platforms, substantially reducing manual effort across development, documentation, and deployment workflows.

Vértere Global Solutions, Inc.

Programmer Analyst III / Full Stack Developer | April 2025 – September 2025

Makati City | Hybrid | Contract

- Collaborated with business stakeholders in an Agile/Scrum environment to gather and prioritize requirements, analyze customer and risk-assessment workflows, and translate business needs into technical specifications, user stories, acceptance criteria, and development tasks across 4 enterprise channels.
- Participated in sprint planning, backlog refinement, daily stand-ups, sprint reviews, and retrospectives, collaborating with product stakeholders, developers, and QA engineers throughout the software development lifecycle.
- Owned and delivered 50% of the MVP scope for a self-service loan portal, developing end-to-end customer workflows using TypeScript, React, and Laravel REST APIs.
- Designed and implemented a risk-evaluation service that automated assessment workflows, reduced manual reviews by 80%, and supported the organization's transition toward a microservice-based architecture.

Rococo Global Technologies Corporation

Full Stack Developer (Promoted from Junior to Mid-Level) | January 2023 – March 2025

Makati City | On-site

- Scaled a real-time IoT monitoring platform using Laravel microservices, Redis, MySQL, C#/.NET, Next.js, TypeScript, and WebSockets, achieving 95% device-status accuracy against validated readings.
- Delivered a full-stack procurement platform using Laravel, Next.js, TypeScript, and MySQL; coordinated user acceptance testing with business users, supported issue resolution before rollout, and helped achieve 95% adoption among targeted users.
- Containerized applications with Docker and implemented CI/CD across Linux-based Nginx/Apache environments, reducing environment setup time by 70% and improving release consistency.
- Remediated 95% of VAPT findings across Laravel, React, Angular, React Native, and backend applications through OWASP-aligned security enhancements; documented remaining items as client-accepted, out-of-scope recommendations.

Quirino State University

Science Research Specialist I / Full Stack Developer | March 2022 – December 2022

Diffun, Quirino | On-site | Contract

- Built a real-time IoT irrigation platform using CodeIgniter, Node.js, WebSockets, REST APIs, and MySQL, improving water-use efficiency by 15%; enhanced the Python sensor-calibration backend, increasing reliability by 30%.

Isabela State University

Project Assistant I / Full Stack Developer | August 2019 – January 2022

Echague, Isabela | On-site | Contract

- Developed a CodeIgniter/MySQL Cassava Phytoplasma Disease (CPD) monitoring platform for 50+ users, increasing engagement by 50%; integrated drone monitoring with 95% operational reliability and supported a Python/OpenCV/TensorFlow disease-detection pipeline.

TECHNICAL SKILLS

Languages & Backend: PHP 7.x/8.x, Laravel, CodeIgniter, JavaScript, TypeScript, Node.js, C#/.NET, Python, REST APIs, Microservices

Frontend & Mobile: React, Next.js, Vue.js, Angular, React Native, Bootstrap, Tailwind CSS, WebSockets, WordPress

Databases: MySQL, MariaDB, PostgreSQL, SQL Server, MongoDB, Firestore, Redis

Cloud & DevOps: AWS, Docker, CI/CD, Cloudflare, Linux, Nginx, Apache, Git, Jira, Azure DevOps

EDUCATION

Bachelor of Science in Information Technology — Isabela State University

June 2019
