PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience designing and scaling enterprise-grade systems across finance, logistics, IoT, and agriculture tech. Skilled in microservices, cloud-native development, and security-first architecture. Proven ability to deliver high-impact solutions with measurable results, including system performance improvements, reduced downtime, and increased adoption rates.

PROFESSIONAL EXPERIENCE

Vértere Global Solutions, Inc. – Makati City (Project-based/Contract)

Full Stack Software Developer / Programmer Analyst III

April 2025 – September 2025

- Developed self-service loan application portal using *TypeScript, React, and Laravel API* delivering 50% of MVP features.
- Built risk evaluation service integrated into enterprise systems, reducing manual reviews by 80%.
- Championed microservice adoption across 4 enterprise channels, collaborating with leads and analysts.

Rococo Global Technologies Corporation – Makati City

Full Stack Software Developer (Promoted from Junior to Mid-Level)

January 2023 – March 2025

- Scaled IoT monitoring system using *Laravel microservices, Redis, MySQL, C#.NET, Next.js (React + Node.js), TypeScript, and WebSockets* improving device accuracy to 95%.
- Delivered procurement system using *Laravel, Next.js (React + Node.js), TypeScript, and MySQL* achieving 95% adoption company-wide; mentored peers on architecture and modular design.
- Implemented Dockerized microservices and CI/CD pipelines, increasing code quality by 70%.
- Applied OWASP-compliant security updates in web using *Next.js (React + Node.js)* and mobile using *React Native* backend using *Laravel* reducing vulnerabilities by 95%.

Quirino State University – Diffun, Quirino (Project-based/Contract)

Full Stack Developer / Science Research Specialist I/Analyst

March 2022–December 2022

- Built IoT irrigation system with real-time monitoring dashboard using *CodeIgniter, WebSockets, Node.js, REST APIs, and MySQL* improving water use efficiency by 15%.
- Enhanced sensor calibration backend using *Python*, increasing system reliability by 30%.

Isabela State University – Echague, Isabela (Project-based/Contract)

Web & Systems Developer / Project Assistant I

August 2019–January 2022

- Developed CPD monitoring web platform using *CodeIgniter and MySQL* for 50+ users, boosting engagement by 50%.
- Deployed responsive web tool and integrated drone monitoring systems, achieving 95% operational reliability.
- Supported machine learning pipeline using *Python, OpenCV, and TensorFlow* for cassava disease detection.

TECHNICAL SKILLS

Core Expertise: PHP (7.x/8.x) · JavaScript · C#.NET · REST APIs · Microservices · Cloud (AWS, Docker, CI/CD, Cloudflare)

Web & Mobile: Laravel · CodeIgniter · Node.js · TypeScript · React.js (core principles, hooks, Redux/Jotai, React Query) · Next.js · React Native · WebSockets · Responsive UI (Bootstrap, Tailwind CSS, SASS, LESS, jQuery, AJAX) · Wordpress

Databases: MySQL · MariaDB · PostgreSQL · MongoDB · SQLite · Firestore · NoSQL · Redis

DevOps & Infra: Linux · Nginx · Apache · Microsoft IIS · Git (GitLab, GitHub, Bitbucket) · Firebase · CI/CD Pipelines

Computer Vision & ML Tools: Python · OpenCV · TensorFlow

Tools: Jira · Trello · Redmine · Agile (Scrum/Kanban) · Figma · Draw.io · Slack · Copilot

EDUCATION

ISABELA STATE UNIVERSITY – Echague, Isabela, Philippines
Bachelor of Science in Information Technology

June 2019
